

**Lawsuit Filed by Ntech Industries Against Holland Scientific  
Dismissed by Arizona Federal District Court**

On June 10, 2009, all claims in the patent infringement lawsuit filed by NTech Industries against Holland Scientific, Inc. were dismissed by order of the United States District Court for the District of Arizona. As such, Holland Scientific is pleased to inform its current and prospective customers that we will continue to sell our line of Crop Circle real-time remote sensing products as well as our new VRAN system without threat of suit from NTech Industries. The new VRAN system was jointly developed with Ag Leader Technology using third generation real-time crop sensing technology and state-of-the-art nitrogen application algorithms. This system will be exclusively available through Ag Leader Technology.

**About Holland Scientific, Inc.:** Holland Scientific is the recognized world leader in active crop canopy sensing technology. We specialize in developing emerging technologies for the agricultural and environmental sciences. Founded in 1999, Holland Scientific is headquartered in Lincoln, NE. More information about Holland Scientific and Holland Scientific products can be found at [www.hollandscientific.com](http://www.hollandscientific.com).
